NOTICE OF PRELIMINARY PERMIT APPLICATION ACCEPTED FOR FILING  
AND SOLICITING COMMENTS, MOTIONS TO INTERVENE, AND COMPETING  
APPLICATIONS

On February 16, 2016, Rivertec Partners, LLC filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Sherman Hydroelectric Project (Sherman Project or project) to be located at the John Day Dam Juvenile Fish Sampling and Monitoring Facility (Juvenile Fish Facility) on the Columbia River near the City of Rufus in Sherman County, Oregon. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would utilize flows at the existing Juvenile Fish Facility, and would consist of the following new features: (1) a 7-foot-diameter, 55-foot-long steel penstock connecting with the Juvenile Fish Facility's existing screened excess water pipe; (2) a 71.2-foot-long, 26.2-foot-wide, 16.4-foot-high concrete and steel powerhouse; (3) a 4.2-megawatt turbine generator; (4) a 10.6-foot-diameter, 31.8-foot-long steel draft tube returning flows to the Columbia River; (5) either a 1,400-foot-long, 13.8-kilovolt (kV) transmission line interconnecting with the existing John Day Dam transformer, or an approximately 120-foot-long, 4.16-kV or 13.8-kV transmission line interconnecting with the existing Bonneville Power Administration substation; and (6) appurtenant facilities. The estimated annual generation of the Sherman Project would be 33 gigawatt-hours.
